

Email Mobility for Enterprise on Any Phone!

Enabling Direct Push email from your company email server

ringEmail Appliance will be on-premise in the enterprise environment, inside its security perimeter. This addresses a key obstacle where enterprises want the simplicity of Software-as-a-Service (SaaS) for key application, like mobile push email service but do not want their critical and proprietary corporate data outside their firewall.

The Business Mobility Solution

Deployment Options for ringEmail Appliance

from as low as 25 users bundle

IBM SYSTEM X3250 and other Hardware options

ringEmail Appliance feature integrated, best-of-breed **ringEmail mobile push email service** combined with **Hardware in an all-in-one appliance** that enables low-cost deployment and management at the Enterprise premises. This gives companies a relatively simple solution that plugs in to their network.

The bundle option allows enterprise to simplify their purchase, licensing, installation and maintenance experience.
