Assuria Teams up with ACW Distribution to offer IT Security and Compliance Solutions

Singapore, 19 December 2008 – ACW partners Assuria, the UK based worldwide provider of IT Security and Compliance software solutions to tap on growing markets in the South East Asian region.

ACW will be introducing the leading solutions and services in IT security and Compliance from Assuria and launch these solutions in the regional markets to serve the growing needs. Assuria's solutions are already widely adopted and utilized by government agencies and commercial enterprises in countries such as Japan, Hong Kong and Taiwan, and ACW hopes to make these available in the region with this strategic partnership.

ACW Distribution Pte Ltd will be supported directly from Assuria's UK head office and will have a significant ability to influence the direction of Assuria products for the South East Asian marketplace.

"We are elated to announce our partnership with Assuria. Assuria's solutions meets the growing attention of enterprises on security and compliance issues in this part of the world, the direction which Assuria is heading is sound and strategically in alignment with ACW's objectives as well. The approach of countering internal threats to data security with automated compliance and auditing solutions would be welcomed as enterprises seek more holistic approach to enterprise security management." said Sam Chng, Country Manager for ACW Distribution ASEAN.

About Assuria

Assuria is a UK based IT Security software developer, providing automated compliance and information assurance solutions. These solutions help to protect corporate and customer information assets from the threat of corruption, theft, abuse and poor controls, especially from insiders.

Assuria solutions automate the scanning, testing and managing of compliance of critical business systems to standards such as ISO27001, PCI DSS and SOX. These solutions help to optimise the security configuration of business servers and constantly monitor those systems for unauthorised changes to system configurations or for suspicious events, looking for unauthorised tampering with security controls or information assets.
